CHARLIE'S MANIFESTO

CHARLIE-BLUE THE HEAD FOR YOU

ABOUT ME

My main motivation for my school life and in general is to become a person my younger self could be proud of and look up to. So just as I strive to be a role model to younger me I want the opportunity to be able to set an example for the younger years of Knox.

I can contribute to the role through my versatility as a team player with strong relations with both the staff and pupils of the great community that is Knox.

I consider myself to be resilient and decisive when put into difficult situations, being sure to consider all my options and assess the collective and individual implications, a skill which I could effectively utilise in the position of head pupil with the aim of strengthening the Knox experience.

I believe that I am a personable person and given the opportunity, I could well represent my fellow students and be trusted with promoting their interests and hearing their concerns.

ABOUT US

Knox is a place where hundreds come together and share the same experience, one which should be fun and educational, and for the most part our school is excellent, however, there are some issues that arise from within and disrupt this idea of community which I hope to be able to effectively discourage.

As a community we should appreciate how fantastic we are and work to only improve our school to make it a place where we can come to grow as individuals together.

POLICIES

I aim to strengthen the Community of Knox as well as to motivate ambition through involving a range of year groups in activities like house games and challenges. This would entail the granting of house points to individual students during classes, with a max of 2 per student for their contributions and behaviour. House games would be a monthly event, with semi competitive games like dodgeball being held for each year group at a time.

Monthly Dress Down Charity Fridays!
As a school we all can appreciate the fun behind a good dress down day especially when it is to the benefit of charity.

I want to create a kind of mental health committee or discussion group, open to all years, in order to promote the expression of concerns and ideas involving pupil mental health as to increase support and raise awareness to give a voice to those struggling in silence.

Open band competitions for all years, including cross year bands, performing their pieces on stage with the potential to win house points for particularly amazing performances. This will be aimed to those with a competitive nature and a musical spirit! A great chance to show off musical talent and have fun while winning points for your house.

Lunch time full pitch football matches for each year group with a tournament like structure, meaning end of month finals for each year group who will win house points following their victory.

I want to reopen the S6 common room in the social area to provide a space for senior pupils to work and socialise during their study periods and between classes.
