

# How to study Maths

## Use Past Papers Wisely:

- Make a list of your mistakes
- Write out solutions, don't just read them
- If you don't understand a question, ask for help!
- Go back a few days later and do the questions on your mistake list again.
- If you get it wrong again, keep it on the mistakes list, ask about it, and try it again a few days

Have you been using your Green Sheet to help you know what to revise?

**NEVER:** just read your notes.  
Maths is a practical subject.  
You need to do questions!

**BE STRATEGIC:** sometimes do whole past papers, sometimes do focus on one topic.  
e.g. have a day where you do all of the tricky circle questions.

**Focus on your weaknesses!**

## Take advantage of the help offered:

- Supported study/ Easter revision, etc.
- Higher Maths Camp
- Lunchtime/ Before School

## TEST YOURSELF:

- Do past papers without your notes
- See what you really know
- Redo the paper a few weeks later
- *Have you improved?*

## Use weekly quizzes:

- To focus your study
- Reattempt what you get wrong
- Ask for help
- Do a textbook exercise on that topic.
